

Walking in the Woods with Chemistry

AN EXHIBITION AT THE UC DAVIS ARBORETUM

October 11 – December 7

Conifer Collection • Mary Wattis Brown Garden
Mediterranean Collection • Storer Garden

Opening Event

October 11
1pm
Arboretum
Gazebo

Featured speakers:

Nhu Nguyen

Professor Dean Tantillo

Professor Philipp Zerbe

Have you ever wondered what makes up the flavor of your wine or how a tree defends itself?

Come take a walk and explore the exhibit featuring 13 plant molecules (terpenes) that are commonly used in medicine, industry, fragrance and flavor.

Displayed next to each plant is a description of the molecule and its uses, as well as a model of its structure made with a 3-D printer.
